ANNUAL GPMC/NMC MEMBER SURVEY

ABOUT GPMC/NMC

GPMC | NMC is an alliance of International Unions that represents unionized workers across the country to negotiate multi trade maintenance collective agreements.

WE WANT TO HEAR FROM OUR MEMBERS

We want to step up the level of representation we provide to you as the members we serve. As part of that, we'll be reaching out with surveys to better understand what you need from us and from your maintenance collective agreements.

GPMC | NMC needs your feedback to help us improve the way we conduct our business.

PARTICIPATE & YOU CAN WIN!

At the end of the survey, you can enter to win a \$100 prepaid credit card – every participating GPMC | NMC site will have a winner. One grand prize winner will receive a \$2,500 Air Canada prepaid gift card to use for travel anywhere in North America!

WELCOME MESSAGE

Dear Maintenance Industry Partners,

On behalf of the General Presidents' Maintenance Committee for Canada/National Maintenance Council for Canada, we extend a warm welcome to all of you to the 7th Annual **Canadian Safety Achievement Awards** Banquet. This evening is a celebration of excellence and a testament to the unwavering commitment to safety in the unionized maintenance industry.

We have made numerous changes to the 2023 CS2A Awards program with the express purpose of highlighting the paramount importance of this initiative to the GPMC/NMC and our industry partners. These improvements serve to reaffirm our unwavering dedication to the acknowledgment and promotion of stringent safety standards, thereby reinforcing our commitment to rewarding a culture of safety excellence.

The dedication of Building Trades Members who tirelessly work to improve safety conditions on the job site is inspiring. We are pleased to announce that this year's Craftperson of the Year nominations have exceeded our expectations. With an abundance of outstanding candidates to choose from, we elected to select two deserving winners: one individual from Eastern Canada and one from Western Canada. This decision reflects the exceptional craftsmanship and commitment to excellence demonstrated by our diverse pool of nominees. We also thank Milwaukee Tool for their partnership in celebrating the Craftperson of the Year and their generous donation to the winners. Their sponsorship is a testament to their organization's commitment to promoting safety and individual excellence.

We are here not only to recognize individual achievements but also to acknowledge the collective contributions of the three pillars of our industry: Local Unions', Signatory Employers', and Clients. Your role in demanding and supporting a culture of safety within your respective organizations and on your projects is invaluable. By prioritizing safety requirements and encouraging everyone to do the same, you have significantly contributed to the reduction of accidents and incidents in our industry.

As we gather here tonight, let us not only celebrate the achievements of our colleagues but also renew our commitment to safety. Let us continue working

together, as industry partners to ensure that the unionized maintenance industry remains a safe and thriving sector for all.

Thank you all for your leadership and unwavering commitment to ensuring that every tradesperson goes home safely every day.

Stay safe!

Charmaine Symmers

CANADIAN SAFETY
ACHIEVEMENT AWARDS

Congratulations to the 2023 CS2A recipients!

This year's winners have prioritized safety in the maintenance industry, a move that's applauded by the Association of Maintenance Contractors Canada (AMCC). Acknowledging that each company has contributed to this shared goal of safety, your efforts elevate professionalism, efficiency, and safety, and align with AMCC's goal of promoting a safe, productive workforce.

PROVIDING SERVICES THROUGHOUT NORTH AMERICA

INITIATIVE

The initiative aims to add value for industry partners, strengthen the tripartite relationship occurring in the industry and continuously promote a culture of health and safety within the unionized maintenance sector.

CS2A uses total recordable incident rating (TRIR) and passage of time in the absence of recordable incidents to set a quantifiable benchmark that all participants can strive to achieve and build upon.

It provides an avenue to share and learn from successful health and safety best practices from work sites and organizations across the country.

PROUD 2023 CS2A AWARD WINNERS

Tripartite Zero Injury Turnaround Award
Q3 Syncrude Canada Ltd., Main Site, Mamawi Turnaround
www.edmontonexchanger.com

TRIR FORMULA

To ensure fairness between competing nominations from worksites of different sizes and scales, an equalizer formula, called the Total Recordable Incident Rating (TRIR), is applied.

Access & Industrial Solutions

Proud member of GPMC/NMC | Supporting Unionized Maintenance

Calgary, AB | 403 259 2600
Edmonton, AB | 780 440 1320
Fort McMurray, AB | 780 743 5011
Halifax, NS | 902 468 9533

Hamilton, ON | 289 919 1135
New Brunswick, NB | 506 633 9820
Sarnia, ON | 519 336 8200
Sudbury, ON | 705 682 0911

WHAT IS A RECORDABLE INCIDENT?

A work related injury, illness or incident that has one or more of the following criteria is to be considered a recordable incident:

- Death
- LTI, days away from work
- Restricted work (light duty) or transfer to another job
- Medical treatment beyond a first aid
- Loss of consciousness

TRIR is calculated by multiplying the total number of recordable incidents by 200,000 (hours worked in a standard year multiplied by 100 full-time employees) divided by the total number of hours worked.

$$\frac{\text{\# of Recordable Incidents} \times 200,000}{\text{Total \# of Hours Worked}}$$

With utmost pride, Stuart Olson accepts the Tripartite Zero Injury Turnaround Award for the 5th consecutive time, presented at the 7th annual CS2A event. Congratulations to all the industry nominees for their outstanding achievements.

GPMC/NMC INDUSTRY PARTNERS

CLIENTS AND PROJECT OWNERS

These multinational businesses have established operations and facilities here in Canada to supply goods and services to consumers across the globe. In recent years, these project owners have expanded in many industrial sectors. The projects undertaken by Clients and Project Owners create a demand for large volumes of skilled tradespeople from the Canadian Building Trades Unions.

Maintenance, Turnarounds, and Operations

Canada and U.S.

SIGNATORY EMPLOYERS

These organizations execute work under the terms and conditions of our agreements. Operating on client worksites, they execute industrial work safely, on time and on budget while ensuring the projects are built right the first time and function without incident. The Signatory Employers seek out industrial projects that provide employment and fair working conditions for skilled tradespeople across the country.

LABOUR PROVIDERS

The 13 International Trade Unions and their affiliated local unions form the skilled labour force and network required to execute massive industrial projects in all regions of Canada. These are the skilled tradespeople who are on-site executing the work required by our Project Owners. Working in cooperation with the Signatory Employers, the membership base and leadership within these organizations have built the infrastructure that all Canadians are benefitting from today.

PROUD WINNER OF:

Fluor  DriverSM
Maintenance • Turnarounds • Capital Projects

It is with immense pride and humility that Fluor Driver accepts this prestigious recognition for the unionized maintenance work performed under the General Presidents' Maintenance Committee for Canada agreement.

The acknowledgment of our dedication to Safety underscores the importance of maintaining the highest standards in our industry. It is our belief that making Safety our Goal not only protects our team but also contributes to the overall success and sustainability of our projects.

We would also like to express our gratitude to our colleagues and team members at Fluor Driver and Suncor, Sarnia, whose unwavering support and collaboration have been instrumental in achieving these milestones. Their commitment to safety and their constant efforts to uphold best practices have undoubtedly contributed to the recognition we are receiving.

William Warchows' Safety Leadership and Innovation

AWARD WINNER

Health and Safety performance is too intricate and dynamic to be measured accurately using simple metrics. The “WWSL&I” Award provides an avenue for maintenance industry stakeholders to share and be rewarded for best practices surrounding leadership, policy and procedure that positively impacts the industry or their own operations.

WINNER: FLUOR DRIVER

Program: PORTABLE BATTERY POWERED WELDING MACHINES
Client Job Site: Suncor Sarnia

DESCRIPTION OF PROGRAM:

During the 2022 Spring Turnaround at the Suncor Sarnia Site, Fluor Driver made the decision to use AC/Battery powered Fronius portable welding machines vs. traditional 6-pack/portable diesel welders for small bore field welds (<6" diameter). This approach was researched on 2 previous turnarounds on a smaller though increasing scale to ensure feasibility and reliability.

Fluor Driver brought in some diesel machines for specific gouging/heavy work, though all other welding was done by the compact portable welders thus eliminating the need to rent 6 packs and install/remove welder temporary power. This eliminated hundreds of exposure hours for electricians and operating engineers and removed the need for operations to permit this work. Another efficiency was the removal of thousands of feet of welding cable because the machine could be brought to the work face vs. Fitter/Welder tracing cables during the execution window.

An additional benefit to the cost and exposure hour savings was the positive environmental impact of removing 50%+ of the diesel welders originally planned for the scope.

Findings were:

EXPOSURE HOURS

Removal of need for Pre/Post hours for temporary power and machine placement as well as execution window hours running/tracing welding cables. In a large event this could be >1000DFL hours.

PORTABILITY

An advantage of a battery power welding machine is that it can be easily transported from one work face to another. This is particularly useful for welders dealing with multiple work fronts, or for those who need to move around within a job site.

QUIET OPERATION

Portable battery power welding machines operate quietly, which is an advantage in a turnaround environment already congested with equipment and personnel.

ENVIRONMENTALLY FRIENDLY

Portable battery power welding machines are environmentally friendly, producing zero emissions and reducing the carbon footprint of your welding work

EASE OF USE

Portable battery power welding machines are generally easier to use than gas-powered welding machines. They don't require refueling or oil changes which cause down time during a turnaround. They also have fewer components to maintain, making them less prone to breakdowns and easier to repair.

This changed the way they execute work on other plant sites across Canada and will become the norm on all scopes where this approach scales to.

Sustained Superior Performance

AWARD WINNERS

The “SSPA” recognizes organizations who collaboratively can sustain superior health and safety performance over an extended period. Awarded to stakeholder groups who execute significant volumes of craft hours with zero recordable incidents at a particular site over multiple years.

7-9 YEARS

Employer	Client Worksite	Injury Free Years	Craft Hours

CRAFTPERSON OF THE YEAR WINNERS & FINALISTS

EASTERN CANADA CRAFT PERSON OF THE YEAR

ROBERT FOSTER

Local Union: United Association of Plumbers & Pipefitters

Local Union 663

Employer: Fluor Driver Inc.

Job Site: Suncor Refinery, Sarnia, Ontario

Robert Foster's career spans over forty years with 30+ years of work under the General Presidents' Maintenance Agreement. He is an 18 year NAUSC certified UA job steward, and his contributions to work and process safety have created a safer working environment.

Bob oversees and coordinates the work of a team of pipefitters including: supervising and managing pipefitting crews, coordinating with other trades, and monitoring safety and quality. Overall, Bob plays a critical role in ensuring that pipefitting work is performed safely, efficiently, and to the required quality standards.

Bob displays leadership and safety conscientiousness on a daily basis through his knowledge of safety regulations, attention to detail, clarity and concision, confidence, empathy, open mindedness, and flexibility. He excels in identifying potential hazards, implementing safety measures to mitigate risks, and providing training and guidance to the team on how to avoid accidents.

He has a thorough understanding of safety regulations and guidelines. This includes knowledge of OSHA (Occupational Safety and Health Administration) specific site standards, safety protocols, procedures, and safety equipment.

Bob conducts Toolbox Talks and Last Minute Risk Assessments to reinforce the importance of safety as his teams top priority. He ends his routine by incorporating one of his favourite safety slogans: "Safety above all else," "Work Safe," "Others Depend on it," etc. These slogans serve as valuable reminders to his team that each individual faces different challenges outside of work, and that the core value of "taking care of each other" ensures everyone's safety.

Bob has contributed to many safety initiatives throughout his career including:

His work on the steering committee for the development of the Sarnia Suncor "Lock out Tag out" Standard.

- ◇ Bob was the driving force behind several successful submissions for Fluor Driver's "Think Different Build Better Program" eg "Equipment Cradle" and "Work Bench"
- ◇ The Act of Vigilance Program participation have increased by 80% with the expectation of one per day per worker, ensuring his team's safety concerns have been addressed and mitigations in place.
- ◇ He was a "team member" first runner-up for the Suncor Operational Excellence Award for development of the Sarnia site "Break Here" program.
- ◇ The implementation of several safety measures, such as the Catalyst Cracker bleed ring at vapour outlet, Crude Unit 04-H110 blank location mods, 11E109 inlet piping redesign Verifiable Isolation for HCC Vapor In & Out among many others.

He has dedicated his career to promoting safety and has shown an unwavering commitment to ensuring that every employee goes home safe at the end of the day. His passion for this mission has inspired countless others to prioritize safety in their own work.

Bob's inspiration for his career came from his father, who was also a UA pipefitter. He learned from his dad's success and has worked hard to follow in his footsteps. Bob has been happily married to his wife, Les Foster, for 32 years, and they have two sons who both served in the Canadian Armed Forces.

SAFETY ABOVE ALL ELSE IS MUCH MORE THAN A SLOGAN FOR BOB. HE TRULY LIVES THAT EVERY SINGLE DAY. HE USES INDUSTRY EXPERIENCE AND EXCELLENT LEADERSHIP SKILLS TO PROVIDE AN IMPORTANT BARRIER TO THE SAFETY OF HIMSELF BUT THOSE AROUND HIM. NEVER IS BOB AFRAID TO QUESTION OR CHALLENGE A SITUATION IN WHICH HE FEELS MAY HINDER THE SAFETY OR SUCCESS OF EACH JOB. HE CONTINUES TO LOOK AHEAD AT THE SCHEDULE TO UNDERSTAND WHAT IS COMING TO HIM...TO PROVIDE MYSELF WITH THE ADDITIONAL SUPPORT REQUIRED TO MAKE SURE JOBS ARE A SUCCESS.

*Dan Tice, Plant 1 Area Coordinator
Suncor, Sarnia Refinery*

ELISE MAILLOUX

Local Union: International Association of Bridge, Structural, Ornamental and Reinforcing Iron Workers
Local Union 720

Employer: Connect Group Inc.

Job Site: Suncor Base Plant, Syncrude, CNRL Horizon

ELISE LEADS BY EXAMPLE,...WILL ALWAYS BE THE FIRST PERSON OUT WORKING & SHE NEVER SHY'S AWAY FROM ANY TASK... SHE SETS THE STANDARD OF WHAT WORK ETHIC AND QUALITY IS EXPECTED BY ALL WORKERS... HER KNOWLEDGE, EXPERTISE, AND ATTENTION TO DETAIL IN HER TRADE...HAS MADE HER A HIGHLY SOUGHT AFTER WORKER TO HAVE, NOT ONLY AS AN EMPLOYEE BUT AS A COWORKER.

*Ryan Crawley, Construction Manager
Connect Group Inc.*

Elise is a Journeyperson Iron Worker working for Connect Group Inc (CGI) at Suncor. She took an unconventional career path from hospitality, to carpentry to roofing before she was introduced to iron work. She discovered iron work was her passion after taking a course and apprenticeship in welding and ornamental/structural iron working. Elise became the first fully certified female ironworker in 1998.

Elise was involved in all major maintenance scopes for Connect Group in 2022 including:

- ◇ Syncrude MLMR DRC 11 emergency break-in chain replacement
- ◇ Syncrude MLMR DRC 10 chain changeout
- ◇ Syncrude MLMR Train 3 Surge Apron Feeder overhaul
- ◇ Syncrude MLMR Train 4 Surge Apron Feeder overhaul

- ◇ Syncrude Aurora Train 3 crusher Apron Feeder overhaul
- ◇ CNRL Horizon OPP A Launder Box Replacement, CNRL Horizon Crusher 5 Apron Feeder overhaul, Suncor Plant 85 OPP A Fire Rebuild
- ◇ Suncor Plant 82T-18 Breaker Replacement

All scopes included rigging & hoisting, heavy lifts, work at heights, rotating equipment, confined spaces, and other hazardous aspects.

At the beginning of each shift Elise is recognized for her Field Level Hazard Assessments, documenting task specific hazard potentials and implementing corrective actions to help keep coworkers' safe. She is an active participant in daily toolbox talks, safety meetings, site discussions, and is a strong advocate for personnel not necessarily comfortable with being heard. She is an expert at rigging & hoisting, work at heights, and various other at-risk activities .

On a recent worksite , Elise was tasked with utilization of hoisting equipment with limited visibility to fellow workers signaling the load. Elise took charge by leading a team huddle and ensuring adequate communication by transfer of hand signals and clear line of site was met. It is examples like these disciplined acts that makes a safer work environment for all.

With Syncrude implementing fail safe procedures in regard to heavy lifting and line of fire, Elise was instrumental in producing a plan to remove the old chain and install new. She suggested the placement of workers, the tooling necessary to safely do the job, and the order in which the steps needed to be taken. She was one of the key players when reviewing the plan with Syncrude to ensure all parties were on the same page and no critical steps were missed. All of these attributes played a large role in regards to meeting scheduled timelines in an already tight schedule.

Connect Group was awarded an apron feeder rebuild project which had not previously been completed and was a new design that most were not familiar with. During the pan installation bolt up process Elise was instrumental in ensuring all pan bolts were installed correctly. This project presented some obstacles due to design and we had many apprentices, as well as journeypersons with limited experience with apron feeder rebuilds. Improperly installed bolts can cause equipment damage and premature wear of components. Elise's quality of work is always second to none and she ensured her co-workers completed all the tasks correctly. The assembly of this apron feeder was completed without any issues or rework and Elise was a major factor to these results.

ELISE'S CONTRIBUTIONS TO HEALTH & SAFETY ARE SIGNIFICANT IN THE SENSE THAT SHE NOT ONLY IDENTIFIES OPPORTUNITIES FOR IMPROVING SYSTEMS AND PROCESSES IN THE INTEREST OF WORKER PROTECTION BUT SHE LEADS BY EXEMPLIFYING SAFETY AND PROFESSIONALISM IN EVERY ACTIVITY SHE IS INVOLVED IN.

*Jesse Johnson, VP, Construction & Project Development
